

Jenstack Centro JL

Space-saving cross folding and stacking
of small pieces for top quality purposes

Application

The Centro JL is a multi-lane combined cross folder and stacker for high quality purposes that is installed after a primary folder.

The Centro JL can perform 1 cross fold by knife between rollers in 3 and 4 lanes.

Operation

When the piece reaches the cross fold position, a knife ① goes down and presses the linen between rollers. During the operation, the folded piece is grapped and led onto a stacking table where the stack is squeezed against a counter pressure device ② giving a compact and perfect looking stack.

Optional centrerer device

A control system consisting of photocells and holding plates ③ detects the position of the linen and regulates the position of the piece during the execution of the cross fold.

This feature optimizes the folding accuracy, giving top quality folds and a nice stack.

When the desired number is reached, the stacking conveyor automatically transports the stack to the collecting position in each lane.

Capacity and speed

Minimum linen width: 300 mm

Maximum linen width: 1100 mm

Minimum linen length: 200 mm

Maximum linen length: 400 mm

Max. capacity: 800–1200 pcs. /lane /hour

Installation

JENSEN is pleased to assist you in planning your laundry by providing excellent advice, layouts and technical data. Authorised JENSEN distributors or JENSEN engineers should carry out the installation to ensure that it is performed correctly.

Service

In addition, JENSEN provides an extraordinary after-sales service through a worldwide

network of highly qualified Sales and Service Centres and distributors, all with their own maintenance and spare parts services.

Call us...

JENSEN provides a complete range of heavy-duty equipment for the laundry industry, delivered and installed according to your specifications. Please do not hesitate to contact us for further advice and information, or visit www.jensen-group.com
